Summary

Senior full-stack engineer with 4+ years of professional experience, specializing in Node.js and TypeScript backend systems — NestJS, gRPC, and distributed, secure service architectures — paired with React / Next.js / Angular / React Native on the front end. Currently at ReserveBar owning multi-PaymentIntent Stripe Connect, service-to-service API contracts, and a high-throughput webhook fan-out system. Previously team lead at Kineton Albania, coaching junior engineers and shipping Node.js services, React Native apps, and a Webpack Module Federation micro-frontend architecture. English (C2); open to relocation.

Experience

ReserveBar Jun 2024 – Present

Software Engineer Ridgefield, CT, USA · Remote

- Designed and built Node.js/NestJS services and type-safe gRPC + Protobuf API contracts for service-to-service communication, alongside a high-throughput webhook system handling multi-source ingest, fan-out delivery, and deduplication for idempotent processing under load.
- Owned Stripe Connect end-to-end — multi-PaymentIntent architecture across per-retailer accounts, full lifecycle operations (capture/refund/revision/multicapture/incremental auth), and fault-tolerant reconciliation.
- Built an internal cloud SDK (**cloud-sdk**; NestJS, GCP Pub/Sub, Spanner, Cloud SQL) with shared conventions for authentication, retries, and structured logging, released through automated semantic-release pipelines.
- Built Next.js and React UI systems — Server Components, Server Actions, shadcn/ui + Tailwind design system, with deliberate server/client partitioning for bundle size and hydration cost.
- Stood up Kubernetes from scratch with Pulumi (IaC) — multi-pod topology and autoscaling across staging and production, integrated into GitHub Actions CI/CD.

Kineton Albania Oct 2022 – May 2024

Software Engineer / Team Lead Tirana, Albania · On-site

- Built Node.js backend services and REST APIs powering internal tools and client applications, alongside AWS workloads (S3 + CloudFront, Lambda, Cognito) with IAM-scoped CI deploys.
- Shipped React Native apps in both bare workflow (custom native modules, Fastlane) and Expo (EAS Build, OTA); published to Play Store and App Store.
- Built a web micro-frontend architecture with Webpack Module Federation — independently deployable remotes, shared singletons, runtime version negotiation.
- Progressed from engineer to team lead within a year — mentored and coached junior engineers, organized cross-functional contributors across up to four concurrent client projects, and owned the release train end-to-end.

Skills

Languages:	TypeScript, JavaScript, Java, SQL, Python
Backend:	Node.js, NestJS, REST API design, gRPC, Stripe Connect, Temporal, FastAPI, Spring Boot
Frontend:	React, Next.js, Angular, React Native, Tailwind CSS, Material UI
Data:	PostgreSQL, MongoDB, Redis, Drizzle ORM, BullMQ, Spanner DB
Cloud & DevOps:	AWS, GCP, Docker, Kubernetes, Pulumi, GitHub Actions, CI/CD
AI & Agentic:	Anthropic Claude SDK, MCP (Model Context Protocol)

Selected Open-Source Projects

webhook-gateway *NestJS, PostgreSQL, BullMQ, TypeScript* GitHub

- Self-hosted, fault-tolerant webhook reliability gateway managing multi-source data persistence, exponential backoff retries, and Dead Letter Queues (DLQ) under bulk load workloads.

temporal-stripe *Temporal, TypeScript, Stripe Connect* GitHub

- OSS Temporal library covering the full Stripe Connect lifecycle (reauth, multicapture, refunds, chargebacks) behind type-safe signals and a saga primitive; deterministic replay with exponential-backoff retries.

tide *Next.js, React, Drizzle, Postgres + pgvector, BullMQ, Anthropic SDK, MCP* GitHub

- OSS self-hostable read-later app — multi-surface save infrastructure, RSC reader, streaming AI summaries via Claude, pgvector semantic search, 100/100 Lighthouse performance.

Education

Canadian Institute of Technology — MSc Software Engineering (Nov 2022 – Jul 2024) · BSc Software Engineering (Oct 2019 – Jul 2022) Tirana, Albania

Languages: Albanian (Native), English (C2), Italian (B2)
