EXPERIENCE

ReserveBar

Software Engineer

Remote, USA

Jun 2024 - Present

- Built and maintained full-stack features across NestJS backends and Next.js frontends, designing services for horizontal scale and long-term maintainability.
- Applied clean architecture principles and built reusable UI systems with shadcn/ui and Tailwind CSS, while deliberately partitioning Next.js work between server and client components to reduce bundle size and improve time-to-interactive.
- Built a Kubernetes infrastructure from the ground up using Pulumi for IaC, designing the multi-pod topology and autoscaling strategy across staging and production environments.
- Implemented gRPC-based service-to-service communication with Protocol Buffers for type-safe contracts, reducing payload size and latency compared to REST across internal microservices.
- Designed a high-throughput webhook system supporting multiple upstream sources and fan-out delivery, with deduplication logic to guarantee idempotent event processing under bulk load.
- Owned the Stripe integration end-to-end: a multi-PaymentIntent Stripe Connect architecture across per-retailer accounts, full lifecycle ops (capture/refund/revision/multicapture/incremental auth), and a fault-tolerant reconciliation layer for partial-failure recovery.

Kineton Albania

Software Engineer

Tirana, Albania

Oct 2022 - May 2024

- Led multiple internal and external projects as team lead, organizing work across cross-functional contributors.
- Contributed across all stages of development, from multi-environment configuration and feature work to release candidates and publishing to the Google Play Store and App Store.

EDUCATION

Canadian Institute of Technology

Master's degree in Software Engineering

Tirana, Albania

Nov 2022 - Jul 2024

Canadian Institute of Technology

Bachelor's degree in Software Engineering

Tirana, Albania

Oct 2019 - Jul 2022

SKILLS

Programming Languages:	TypeScript, JavaScript, Java, Kotlin, Swift, Python
Frameworks:	React Native, React, Next.js, NestJS, Angular, Spring Boot, Node.js
Cloud & Infrastructure:	Docker, Kubernetes, Pulumi, GCP (Pub/Sub, Spanner, Cloud SQL), Firebase
Tools:	Git, gRPC, Stripe, Contentful, Maven, Gradle, Webpack, CocoaPods, Module Federation

PROJECTS

Cloud SDK *GCP Retail, NestJS, Pub/Sub, Spanner DB, gRPC, Kubernetes, MongoDB*

GitHub

- Designed and published an internal SDK wrapping GCP services (Pub/Sub, Spanner, Cloud SQL) with shared conventions for auth, retries, and structured logging.
- Built most NestJS microservices consuming the SDK, keeping its design grounded in real usage patterns.
- Released through a semantic-release pipeline for predictable versioning across downstream teams.

Reservebar *TypeScript, Next.js, NestJS, Tailwind, shadcn/ui, RTK Query, Turborepo, Docker*

Website

- E-commerce platform with a Next.js storefront, Contentful CMS, and NestJS microservices.
- Worked across customer-facing features, the multi-retailer Stripe Connect payments architecture, and event-driven catalog/order services.

Nurselo GmbH *React, React Native, Node.js, Firebase, Google Maps, Geocoding*

Live Demo

- Built a nurse job-search platform: React Native app for browsing/applying to shifts by location, web app for hospital admin management.
- Implemented location-based shift discovery using Haversine formula and geocoding APIs.
- Set up Firebase Cloud Messaging as a cloud function and configured React Native for debug/release environments using targets and build flavors.
