SUMMARY

Senior full-stack engineer with 4 years shipping production — React / Next.js / Angular / React Native on the front; NestJS, Java / Spring Boot, gRPC on the back; Kubernetes-on-Pulumi for infrastructure. Currently at ReserveBar owning multi-PaymentIntent Stripe Connect, gRPC service contracts, and high-throughput webhook fan-out. Previously team lead at Kinton Albania shipping React Native to Play Store + App Store and a Webpack Module Federation web architecture. OSS author (tax-ledger, temporal-stripe, webhook-gateway).
Tirana-based, EU timezone, open to senior IC + contract.

EXPERIENCE

ReserveBar Ridgefield, CT, USA · Remote
Software Engineer Jun 2024 – Present

- Built Next.js 16 + React 19 UI systems — Server Components, Server Actions, shadcn/ui + Tailwind design system; deliberate server/client component partitioning for bundle size and hydration cost.
- Owned Stripe Connect end-to-end — multi-PaymentIntent across per-retailer accounts, full lifecycle ops (capture/refund/revision/multicapture/incremental auth), fault-tolerant reconciliation.
- Stood up Kubernetes from scratch with Pulumi (IaC) — multi-pod topology and autoscaling across staging + production.
- Type-safe gRPC + Protobuf service-to-service contracts; high-throughput webhook system with multi-source ingest, fan-out delivery, and dedup logic for idempotent processing under load.

Kinton Albania Tirana, Albania · On-site
Software Engineer / Team Lead Oct 2022 – May 2024

- Shipped React Native apps in both bare workflows (custom native modules, Fastlane) and Expo (EAS Build, OTA); published to Play Store + App Store.
- Built a web micro-frontend architecture with Webpack Module Federation — independently deployable remotes, shared singletons, runtime version negotiation.
- Led multiple internal + external projects as team lead, organizing cross-functional contributors and owning the release train end-to-end; operated AWS workloads (S3 + CloudFront, Lambda, Cognito) with IAM-scoped CI deploys.

SKILLS

Languages: TypeScript, Java, SQL, Python
Frontend: React, Next.js, Angular, React Native, Tailwind CSS
Backend: Node.js, NestJS, Spring Boot, Stripe Connect, gRPC, Temporal
Data: PostgreSQL, MongoDB, Redis, Drizzle ORM, BullMQ
Cloud & Infra: Docker, Kubernetes, Pulumi, GitHub Actions

SELECTED OPEN-SOURCE PROJECTS

tax-ledger *TypeScript, Decimal.js, Zod, fast-check, Drizzle* GitHub

- Append-only tax ledger downstream of Avalara / TaxJar / Stripe Tax / Fonoa — ISO-4217 minor-unit math, Hamilton allocator, engine-quoted-reversal reconcile. 6 packages, 147 tests, MIT.

temporal-stripe *Temporal, TypeScript, Stripe Connect* GitHub

- OSS Temporal library covering the full Stripe Connect lifecycle (reauth, multicapture, refunds, chargebacks) behind type-safe signals and a saga primitive; deterministic replay with exponential-backoff retries.

webhook-gateway + webhook-gateway-admin *NestJS, Postgres, BullMQ, Angular 19* GitHub

- Self-hosted webhook reliability gateway (NestJS) + companion Angular 19 admin (zoneless, signals, TanStack Query, Zod) — same backend, two frontends.

EDUCATION

Canadian Institute of Technology — MSc Software Engineering (Nov 2022 – Jul 2024) · BSc Software Engineering (Oct 2019 – Jul 2022) Tirana, Albania
Languages: Albanian (Native), English (C2), Italian (B2), French (A2)
