SUMMARY

Senior full-stack engineer shipping production-grade architectures — React / Next.js / Angular / React Native on the front; NestJS, Java / Spring Boot, Python, gRPC on the back; Kubernetes-on-Pulumi for infrastructure. Currently at ReserveBar owning multi-PaymentIntent Stripe Connect, gRPC service contracts, and high-throughput webhook fan-out systems. Previously team lead at Kineton Albania shipping React Native apps and a Webpack Module Federation web architecture.

EXPERIENCE

- ReserveBar**
Software Engineer

Ridgefield, CT, USA · Remote
Jun 2024 – Present

 - Built Next.js and React UI systems — Server Components, Server Actions, shadcn/ui + Tailwind design system; deliberate server/client component partitioning for bundle size and hydration cost.
 - Owned Stripe Connect end-to-end — multi-PaymentIntent across per-retailer accounts, full lifecycle ops (capture/refund/revision/multicapture/incremental auth), fault-tolerant reconciliation.
 - Stood up Kubernetes from scratch with Pulumi (IaC) — multi-pod topology and autoscaling across staging + production.
 - Designed type-safe gRPC + Protobuf service-to-service contracts alongside a high-throughput webhook system with multi-source ingest, fan-out delivery, and deduplication logic for idempotent processing under load.
- Kineton Albania**
Software Engineer / Team Lead

Tirana, Albania · On-site
Oct 2022 – May 2024

 - Shipped React Native apps in both bare workflows (custom native modules, Fastlane) and Expo (EAS Build, OTA); published to Play Store + App Store.
 - Built a web micro-frontend architecture with Webpack Module Federation — independently deployable remotes, shared singletons, runtime version negotiation.
 - Led multiple internal + external projects as team lead, organizing cross-functional contributors and owning the release train end-to-end; operated AWS workloads (S3 + CloudFront, Lambda, Cognito) with IAM-scoped CI deploys.

SKILLS

Languages:	TypeScript, JavaScript, Java, SQL, Python
Frontend:	React, Next.js, Angular, React Native, Tailwind CSS, Material UI
Backend:	Node.js, NestJS, Spring Boot, Stripe Connect, gRPC, Temporal, FastAPI
Data:	PostgreSQL, MongoDB, Redis, Drizzle ORM, BullMQ, Spanner DB
Cloud & Infra:	Docker, Kubernetes, Pulumi, GitHub Actions, AWS, GCP

SELECTED OPEN-SOURCE PROJECTS

- cloud-sdk** *GCP Retail, NestJS, Pub/Sub, Spanner DB, gRPC, Kubernetes*

GitHub

 - Internal SDK wrapping cloud services (Pub/Sub, Spanner, Cloud SQL) with shared conventions for authentication, retries, and structured logging; released through automated semantic-release pipelines.
- webhook-gateway** *NestJS, PostgreSQL, BullMQ, TypeScript*

GitHub

 - Self-hosted, fault-tolerant webhook reliability gateway managing multi-source data persistence, exponential backoff retries, and Dead Letter Queues (DLQ) under bulk load workloads.
- temporal-stripe** *Temporal, TypeScript, Stripe Connect*

GitHub

 - OSS Temporal library covering the full Stripe Connect lifecycle (reauth, multicapture, refunds, chargebacks) behind type-safe signals and a saga primitive; deterministic replay with exponential-backoff retries.
- tide** *Next.js, React, Drizzle, Postgres + pgvector, BullMQ, Anthropic SDK*

GitHub

 - OSS self-hostable read-later app — multi-surface save infrastructure, RSC reader, streaming AI summaries via Claude, pgvector semantic search. 100/100 Lighthouse performance.

EDUCATION

Canadian Institute of Technology — MSc Software Engineering (Nov 2022 – Jul 2024) · BSc Software Engineering (Oct 2019 – Jul 2022) Tirana, Albania
Languages: Albanian (Native), English (C2), Italian (B2)
