EXPERIENCE

ReserveBar

Software Engineer

Ridgefield, CT, USA · Remote

Jun 2024 - Present

- Built and maintained full-stack features across NestJS backends and Next.js frontends, designing services for horizontal scale and long-term maintainability.
- Built reusable UI systems with shadcn/ui + Tailwind CSS; partitioned Next.js work between server and client components to reduce bundle size and improve time-to-interactive.
- Owned Stripe end-to-end – multi-PaymentIntent Stripe Connect across per-retailer accounts, full lifecycle ops (capture/refund/revision/multicapture/incremental auth), fault-tolerant reconciliation for partial-failure recovery.
- Stood up Kubernetes from scratch with Pulumi for IaC – multi-pod topology and autoscaling across staging + production.
- Implemented gRPC service-to-service communication with Protobuf for type-safe contracts; reduced payload size and latency vs. REST across internal microservices.
- Designed a high-throughput webhook system with multi-source ingest and fan-out delivery, dedup logic for idempotent processing under bulk load.

Kinton Albania

Software Engineer

Tirana, Albania · On-site

Oct 2022 - May 2024

- Led multiple internal and external projects as team lead, organizing cross-functional contributors and owning the release train end-to-end.
- Shipped React Native apps across both bare workflows (custom native modules, Fastlane pipelines) and Expo (EAS Build, OTA updates).
- Built a web micro-frontend architecture with Webpack Module Federation – independently deployable remotes, shared singletons, runtime version negotiation.
- Operated AWS workloads – S3 + CloudFront, Lambda, Cognito – with IAM-scoped CI deploys; published apps to Google Play Store + App Store.

EDUCATION

Canadian Institute of Technology

Master's degree in Software Engineering

Tirana, Albania

Nov 2022 - Jul 2024

Canadian Institute of Technology

Bachelor's degree in Software Engineering

Tirana, Albania

Oct 2019 - Jul 2022

SKILLS

Programming Languages:	TypeScript, JavaScript, Java, Kotlin, Swift, Python
Frameworks:	React Native, React, Next.js, NestJS, Angular, Spring Boot, Node.js
Cloud & Infrastructure:	Docker, Kubernetes, Pulumi, AWS, GCP (Pub/Sub, Spanner, Cloud SQL), Firebase
Data:	PostgreSQL, MongoDB, Redis, BullMQ
Tools:	Git, gRPC, Temporal, Stripe, Module Federation, Fastlane, Gradle, Maven

PROJECTS

Cloud SDK GCP Retail, NestJS, Pub/Sub, Spanner DB, gRPC, Kubernetes, MongoDB

GitHub

- Designed and published an internal SDK wrapping GCP services (Pub/Sub, Spanner, Cloud SQL) with shared conventions for auth, retries, and structured logging.
- Built most NestJS microservices consuming the SDK, keeping its design grounded in real usage patterns.
- Released through a semantic-release pipeline for predictable versioning across downstream teams.

Reservebar TypeScript, Next.js, NestJS, Tailwind, shadcn/ui, RTK Query, Turborepo, Docker

Website

- E-commerce platform with a Next.js storefront, Contentful CMS, and NestJS microservices.
- Worked across customer-facing features, the multi-retailer Stripe Connect payments architecture, and event-driven catalog/order services.

stripe-eu-vat-moss Java 21, Spring Boot, JOOQ, Liquibase, Pulumi-Java

GitHub

- OSS EU VAT One-Stop-Shop engine – bitemporal Postgres event store via JOOQ, 27-country VAT matrix, SAF-OSS XML returns, Stripe Connect deemed-seller routing under Art. 14a.
- 5.4k LOC across 9 Gradle modules; 116 tests passing; Pitest 72% mutation kill; Jib distroless container deployed to Oracle Cloud Always-Free via Pulumi-Java.
